Questions:

Has your doctor ever said that you have a heart condition and that you should only perform physical activity recommended by a doctor?

Yes : No :

Do you feel pain in your chest when performing physical activity?

Yes : No :

Have you experienced chest pain when NOT performing physical activity in the last month?

Yes : No :

Do you lose your balance because of dizziness or have you lost consciousness recently?

Yes : No :

Do you have any bone or joint problems such as arthritis, which could be aggravated through physical activity?

Yes : No :

Is your doctor currently prescribing you medications for high blood pressure or a heart condition?

Yes : No :

Currently, I do not exercise regularly. Do you agree with this statement?

Yes : No :

Is there any reason why you should not participate in physical activity?

Yes : No :

Reason :

If you answered yes to one or more questions or are concerned about your health, consult a physician before taking a fitness test or substantially increasing your physical activity. You should ask for a medical clearance along with information about specific exercise limitations you may have.

If you answered no to all the PAR-Q questions, you can be reasonably sure that you can exercise safely and have low risk of having any medical complications from exercise. It is still important to start slowing and increase gradually.

PLEASE NOTE: If your health changes so that subsequently you answer YES to any of the above questions, inform your fitness or health professional immediately. Ask whether you should change your physical activity or exercise plan.

If you are not feeling well because of a temporary illness, such as a cold or a fever, wait until you feel better to begin exercising. If you are or may be pregnant, talk with your doctor before you start becoming more active.
