

One-To-One iPad Scheme 2025/26: Parent Information

We operate a 1-1 iPad scheme for new Shells. Each Shell will receive an iPad (11th Gen) with Logitech Crayon or similar, Rugged Folio For iPad keyboard case or similar and folio carry case to ensure everyone has access to the technology and to act as a companion to their studies, allowing them to take advantage of digital inking and other technologies used in learning for their first three years.

The leasing scheme will run over 3 years (9 terms), in which a fee of £90 per term per pupil will be incurred by you as the parent. Before the end of this period, we will be in touch with you regarding a final payment to take full ownership of the device.

Alongside the device and its peripherals, a 3-year extended warranty is included which will cover the iPad only. As a school, we will insure the device against loss and breakages that do not fall under the warranty for repair or replacement. Please note that breakages or loss of each component will be limited to a single replacement (1 full iPad replacement + 1 case replacement + 1 Crayon replacement) each year per pupil with an excess as listed in the table below, any further replacements in the same year may incur the full cost.

Item	Excess
iPad	£90
Rugged Folio	£25
Logitech Crayon	£15
Power Supply	£18 (full cost)
Charging Cable	£18 (full cost)
Replacement Zip Folio	£12 (full cost)

iPads are used to provide all the educational benefits whilst at the same time allow access to other devices, such as phones, to be more closely monitored and, especially in the junior years, appropriately restricted. This will provide reassurance to parents and to Tutors from a pastoral perspective but allow educational advantage to flourish.

FAQ:

Do I need to buy a protective case?

No, the case provided (Rugged Folio) covers the device including the screen. The additional folio carry case provides another layer of protection, also allowing boys to carry additional items to lessons such as calculators and other stationery.

Can I mark the Case/iPad to identify it?

The serial number of the iPad, Case and Crayon are linked to your son, we will laser etch your son's name on to the Crayon and the power supply, but you may want to attach stickers to the iPad case to identify it. Stickers are permissible, however do not use any marker pens or scribing as this may affect any repairs/replacements.

What happens if my son loses or damages the Crayon?

Replacement nibs for the Crayon will be available at a cost or can be purchased online at your own expense. After the first replacement Crayon in the year, it is advised that you seek to claim through your own personal effects insurance or purchase a replacement. The case does have a loop holder for the Crayon to keep it secure to the device.

My son already has a device they work on, do they need another?

We understand that there are circumstances in which boys will have a device. In order to provide and facilitate the level of teaching and learning we offer at Radley, the managed iPad provided is key – it comes with all of the apps and packages we require, digital inking which is key to many subjects and allows for a level of control in its use. It is envisaged that the iPad will become a companion device; a versatile note taking tool in the classroom with the ability to complete more onerous tasks when needed.

What if my son leaves the College early?

Under these circumstances, the device should be returned to the IT Helpdesk. The device will then be wiped clean and reused. Your lease payments will cease at the point of return.
